About me/

Moving between countries growing up meant resources were often limited and I was always finding materials that allowed me to build and craft. I fell in love with problem solving, uncovering how things work and creating something new. A sensitivity to the details is what shapes a product's identity and that's why I design.

Education/

ArtCenter College of Design, Los Angeles
Bachelor of Science in Product Design 2017-2021

LASALLE college of the arts, Singapore
